

VIPP496

Cabin Square Table

PRODUCT DESCRIPTION

The eight person Cabin square table is available with two types of natural stone: Pietra Grey marble and Jura Grau Blau limestone. The visual expression of both types of stone tells the tale of millions of years of natural processing. Veins, fossils, and colour shades are the result of peculiar geological conditions and guarantee that no stones are identical. Supporting the heavy top are two parallel legs in either dark or light solid oak, carved with vertical ridges.

PRODUCT MATERIALS
 & SURFACE TREATMENT

Pietra Grey marble

Showcasing a dark grey background the Pietra grey marble features bold, contrasting white and black veins. These veins traverse the surface of the stone in intricate patterns, creating a refined contrast against the grey background. The veins can vary in thickness, from fine and delicate lines to broader, more pronounced streaks. Occasionally, yellow streaks or red burns may be revealed in the veins.

Finish

Honed (matte), sealed with natural impregnation slightly enhancing the color yet leaving a matte protected surface.

Wood base

The table base is made from natural solid oak wood, which can vary in colour and grain, making each base unique. The oak is lacquered light oak or dark stained oak for a durable protected end result.

Jura Grau Blau limestone

Jura is a dense, fine-grained limestone rich in fossils. The Grau Blau Jura is characterized by a rustic appearance that spans in hues from warm, golden tones to cold, grey tones. Glass veins can appear as cracks but are simply a natural characteristic of the stone.

PRODUCT CHARACTERISTICS
 & MAINTENANCE

Characteristics

Marble is a natural material, and each piece of marble is unique. Please note that the visual expressions of the marble will vary.

Marble

Gentle, regular cleaning is recommended. Dust off the surface regularly and wipe down the marble with a damp cloth when needed. If necessary, add a mild, acid-free detergent. Remove the detergent with a clean damp cloth. Marble is limestone and does not tolerate any kind of acid (juice, wine, ketchup etc.) Marble is sensitive and should be treated cautiously. Always use coasters for drinking glasses and rivets for hot items to keep your table beautiful and free from marks and stains.

Stain removal

Remove stains immediately using a lint-free cleaning cloth with warm water and a mild detergent. Avoid using dusting sprays or abrasive cleaners. In case of serious damage contact a professional polisher.
